#### Fourth Quarter 2021 Highlights and Recent Developments

- Retail partner rollouts resuming as pandemic impacts recede. FlexShopper currently expects to add over 500 partner store locations during
  the first half of the year as new and existing pilot programs expand.
- **Expanded borrowing capacity provides capital to support expected growth.** The Company recently announced an expansion of its credit facility from \$52 million to \$82.5 million. The additional capacity is expected to support continued growth of the business.
- Company expects Adjusted EBITDA growth rate to continue or accelerate. FlexShopper expects demand for alternative finance solutions among subprime customers to continue normalizing in 2022 and, as a result, expects 2022 Adjusted EBITDA to grow at or above the rate in 2021.

Rich House, CEO, stated, "2021 was a challenging year across our industry as subprime consumers benefitted from a range of government stimulus programs which, in turn, reduced their demand for alternative financing products and solutions. This negatively impacted our new lease originations for the full year. Despite the headwind for much of the year, we were able to grow our bottom line. For the year, we reported net income of \$0.8 million after accounting for non-cash preferred dividend accrual, compared with a loss of \$3.5 million in the prior year, with Adjusted EBITDA growing 31% to \$11.4 million. Importantly, we achieved this improved profitability without compromising our underwriting. Across our industry we saw many participants do the opposite to maintain volume in the face of reduced demand for alternative financing solutions resulting from massive government stimulus. Those competitors now appear to be reversing course, which is a positive for FlexShopper."

Mr. House continued, "As the recent COVID surge has receded, we have seen our industry steadily returning to normal. Notably, we have seen existing and new retail partners eager to resume rolling out our lease to own solution. We currently expect to add over 500 stores over the first half of the year, consisting of new pilot programs and other full roll outs. We have also recently introduced a consumer lending product to further support our retail partners. Lease to own contracts are limited to durable goods, leaving a gap for our tire store partners when subprime customers need service work such as wheel alignments. Our new lending product addresses this need, providing a value-added solution for our partners and their customers. Initial interest in this product has been positive and we expect to see continued growth through the year, eventually creating a material impact on our financial results."

Additionally, Adjusted EBITDA is a non-GAAP financial measure. Refer to the definition of this measure under "Non-GAAP Measures."

#### Non-GAAP Measures

We regularly review a number of metrics, including the following key metrics, to evaluate our business, measure our performance, identify trends affecting our business, formulate financial projections and make strategic decisions.

Adjusted EBITDA represents net income before interest, stock-based compensation, taxes, depreciation (other than depreciation of leased inventory), amortization, and one-time or non-recurring items. We believe that Adjusted EBITDA provides us with an understanding of one aspect of earnings before the impact of investing and financing charges and income taxes.
